4. AI Usage Declaration

AI Tools Used: - ChatGPT - Antigravity Purpose: - Landing page design generation - HTML structure creation - Tailwind CSS styling assistance - Gallery section implementation - Debugging and layout improvements Sample Prompts: 1. Create a responsive laundry service landing page using Tailwind CSS. 2. Design a modern laundry management website. 3. Add a gallery section for a laundry service webpage. 4. Improve the landing page layout and responsiveness. 5. Generate a professional laundry service website design. Declaration: I used AI tools (ChatGPT and Antigravity) for design suggestions, code generation assistance, debugging, and content refinement. The final customization, testing, editing, and submission were completed by me.

5. Domain Information and Reflection

Domain: Laundry Management System Problem Statement: Traditional laundry services often rely on manual order tracking, causing inefficiencies. Objective: To simplify laundry management through digital order tracking and efficient service management. Outcome: A responsive laundry service landing page was developed. Reflection: This project improved my understanding of HTML, Tailwind CSS, GitHub, and responsive web design.
